

Laminate for Healthcare

Containing Anti-Microbial Properties

 GENESIS PRODUCTS

www.genesisproductsinc.com

Laminate products are nonporous in nature and this makes them ideal for keeping clean in the most stringent environments.

HPL, TFL and 3DL Laminate products are designed to be durable, easy to maintain, and easy to clean. Due to their design properties, laminate surfaces do not support microbial growth and have been widely used in Office, Education, Bathrooms, Hotel Rooms and Healthcare environments for years due to their long life and aesthetic beauty they offer. Genesis Products is your comprehensive Panel, Door and Component Lamination supply partner.
